Issues for Discussion**BEST AVAILABLE COPY****Re: U.S. Patent Application No. 09/874,274**

1. Discussion of Jalili reference with respect to the limitation of "transmitting, after each selection of each of the multiple points in a graphical image, coordinates associates with a portion of the security code from the client to the server over the connection."
 - a. Does Examiner believe that Jalili discloses [i] transmission of all selected coordinates as a group; or [ii] transmission of each individual coordinate immediately after selection by a user?
 - b. Does Examiner believe that Applicant's claim language does not sufficiently describe the transmission of each selected group of coordinates immediately after selection of each group of coordinates?
2. Do paragraphs 32 and 33 provide enabling disclosure with respect to an end character – specifically, does the last sentence of paragraph 33 disclose this limitation?
